

# ASG Enhanced Income Feeder Fund USD

Diversified Income Portfolio

**ASG CAPITAL**  
ASSET MANAGEMENT

As of November 30, 2023

## INVESTMENT STRATEGY

ASG Enhanced Income Fund seeks to generate long-term value for investors, through an income-generating portfolio of securities providing high recurring returns.

These include Preferred Securities issued by Large Corporations, Subordinated Debt, Hybrid Securities, Contingent Convertible Bonds, Dividend Earning Equity and Real Estate Income generating investment vehicles.

Overseen by experienced managers, the ASG Enhanced Income Fund will be looking to obtain a high-performance potential through a well-diversified portfolio of international investments.

Through our dynamic and action investment approach, ASG Capital strategically invests in investment companies with strong balance sheets and sustainable earnings patterns that we believe they will reach a performance over and above an equivalent static portfolio.

By leveraging the interest premium available, the Fund gives investors a unique opportunity to obtain high recurring income returns which can be distributed on a quarterly basis.

This investment vehicle is available to Non-US accredited investors only.

## PERFORMANCE COMMENTARY

The ASG Fund Performance for November is +2.21%.

The volatility 'Move index' for Fixed Income saw an average of 116. This improvement continues to underscore the historic high volatility in the bond market as compared to previous years.

We maintain balanced allocations:

- Neutral long maturity dated or callable bonds 5years. The duration was increased to 3.04years.
- Neutral on Additional Tier 1 USD.
- Neutral Subordinated Floaters.
- Underweight on Short dated maturity bonds less than 1year, as the reinvestment option they offer is progressively deployed.

US 2year swap rates moved lower -8.2% to around 4.5%. 10year swap rates declined -11.6% to finish just under 4%. The curve remains inverted.

The US Dollar versus other major currencies in the DXY index fell -3%.

November was a very positive month for the Fixed Income asset class. The sentiment that monetary authorities had reached a limit in their policy actions was felt by numerous market participants. This stabilization phase is reassuring for many bond investors, sidelined over the last two years by rising rates and high fixed income volatility. In turn, this should encourage their progressive return to this investment space.
