

ASG Enhanced Income Fund (LP)

Diversified Income Portfolio

ASG CAPITAL
ASSET MANAGEMENT

As of March 31, 2024

INVESTMENT STRATEGY

ASG Enhanced Income Fund seeks to generate long-term value for investors, through an income-generating portfolio of securities providing high recurring returns.

These include Preferred Securities issued by Large Corporations, Subordinated Debt, Hybrid Securities, Contingent Convertible Bonds, Dividend Earning Equity and Real Estate Income generating investment vehicles.

Overseen by experienced managers, the ASG Enhanced Income Fund will be looking to obtain a high-performance potential through a well-diversified portfolio of international investments.

Through our dynamic and action investment approach, ASG Capital strategically invests in investment companies with strong balance sheets and sustainable earnings patterns that we believe they will reach a performance over and above an equivalent static portfolio.

By leveraging the interest premium available, the Fund gives investors a unique opportunity to obtain high recurring income returns which can be distributed on a quarterly basis.

This investment vehicle is available to US accredited investors only.

PERFORMANCE COMMENTARY

The ASG Enhanced Income Fund LP performance was +1.47% for the month of March. The ASG Fund overperformed the main USD subordinated/preferred security index (PFF), which was up +0.16% on the month.

The volatility 'Move index' for Fixed Income came down 11 points from the previous month, to under 100.

We maintain balanced allocations:

- Overweight long maturity dated or callable bonds. The duration was increased to 5.4 years.
- Overweight Additional Tier 1 bonds;
- Underweight Subordinated Floaters.
- Underweight Short dated maturity bonds less than 1 year.

US 2 year swap rates stayed on the same level. 10 year swap rates fell by -1%. The interest rate curve remains inverted.

The US Dollar versus other major currencies in the DXY index increased less than +0.5%.

Credit bond subordinated assets on the other hand were well supported on the back of the 'high' absolute yield they offer.

ASG continues to add duration to its portfolio as and when the opportunity arises. ASG is conscious any 'liquidity turn' from money markets into this investment space could quickly overwhelm the limited supply available of 'quality' instruments in this asset class.
