

ASG Enhanced Income Feeder Fund USD

Diversified Income Portfolio

ASG CAPITAL
ASSET MANAGEMENT

As of September 30, 2024

INVESTMENT STRATEGY

ASG Enhanced Income Fund seeks to generate long-term value for investors, through an income-generating portfolio of securities providing high recurring returns.

These include Preferred Securities issued by Large Corporations, Subordinated Debt, Hybrid Securities, Contingent Convertible Bonds, Dividend Earning Equity and Real Estate Income generating investment vehicles.

Overseen by experienced managers, the ASG Enhanced Income Fund will be looking to obtain a high-performance potential through a well-diversified portfolio of international investments.

Through our dynamic and action investment approach, ASG Capital strategically invests in investment companies with strong balance sheets and sustainable earnings patterns that we believe they will reach a performance over and above an equivalent static portfolio.

By leveraging the interest premium available, the Fund gives investors a unique opportunity to obtain high recurring income returns which can be distributed on a quarterly basis.

This investment vehicle is available to Non-US accredited investors only.

PERFORMANCE COMMENTARY

The ASG Enhanced Income Feeder Fund USD performance was up +1.32% this month.

The volatility 'Move index' remained above 100 during the month. This reflects a persistent instability in the Fixed Income market.

We maintain balanced allocations:

- Neutral long maturity dated bonds. The duration was up to 5.01 years.
- Neutral Additional Tier 1 bonds, allocation was down slightly.
- Neutral Subordinated Floaters.
- Neutral Short dated maturity bonds less than 1 year.

US 2year swap rates fell -8.7%. 10year swap rates fell -4%. The swap interest rate curve remains still inverted. Please note, the US treasury curve un-inverted for the first time since the summer of 2022.

The US Dollar versus other major currencies in the DXY index fell by -0.9%.

The first American interest rate cut of -0.50% took place in September. The authority's declared objective is to reach 3% to 3.5% for the Fed. Funds rate by the end of 2025.

The usual narrative of caution was dished out concerning price stability by its Chairman, Mr Powell.

And so, the Federal Reserve embarks on a rate cutting cycle joining their other colleagues across the 'pond'.
