

ASG Enhanced Income Feeder Fund USD

Diversified Income Portfolio

ASG CAPITAL
ASSET MANAGEMENT

As of May 31, 2025

INVESTMENT STRATEGY

ASG Enhanced Income Fund seeks to generate long-term value for investors, through an income-generating portfolio of securities providing high recurring returns.

These include Preferred Securities issued by Large Corporations, Subordinated Debt, Hybrid Securities, Contingent Convertible Bonds, Dividend Earning Equity and Real Estate Income generating investment vehicles.

Overseen by experienced managers, the ASG Enhanced Income Fund will be looking to obtain a high-performance potential through a well-diversified portfolio of international investments.

Through our dynamic and action investment approach, ASG Capital strategically invests in investment companies with strong balance sheets and sustainable earnings patterns that we believe they will reach a performance over and above an equivalent static portfolio.

By leveraging the interest premium available, the Fund gives investors a unique opportunity to obtain high recurring income returns which can be distributed on a quarterly basis.

This investment vehicle is available to Non-US accredited investors only.

PERFORMANCE COMMENTARY

The ASG Enhanced Income Feeder Fund USD performance was up +1.40% this month. The ASG Fund overperformed its benchmark index, which was up only +0.28%. The ASG Fund also over-performed the main USD subordinated/preferred security index (PFF), which rose +0.97% on the month.

The volatility 'Move index' fell to just over 100 on average during February, reflecting a more stable environment in Fixed Income markets.

We maintain balanced allocations:

- Neutral on long maturity dated bonds.
- Neutral Additional Tier 1 bonds
- Neutral Subordinated Floaters.
- Neutral Cash and Short dated maturity bonds less than 1year.

US 2year swap rates rose from 3.38% to 3.67%. US 10year swap rates rose also from 3.63% to 3.86%.

The DXY index was flat lined at 99.5.

The geopolitical situation linked to trade sanctions continues to remain chaotic and uncertain. However, a close-up analysis focused on the real impact of this new political paradigm has moved away from the initial knee-jerk reaction of the previous month. In its wake, a more stable Fixed Income environment encouraged a return of investors to high yielding investments, such as subordinated debt. Our fund managed to capture fully this trend.
